

UNIPOL ECOFREPS

Issue date: 4/4/2023 Replaces: 10/01/2023 Version: 2.2

SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE **COMPANY/UNDERTAKING**

1.1 Product identification

> Product identifier **UNIPOL ECOFREPS**

> > Flame Retardant Polystyrene

FR-EPS, Flame Retardant Expandable polystyrene, Synonyms

poly(phenylethene).

Unique formula identification (UFI) No UFI required for a non-hazardous mixture

1.2 Relevant identified use of the substance or the

mixture and uses advised against

Identified use Used primarily for the manufacture of foamed thermal

This product should not be used for applications other than Use advised against

identified above without seeking prior advice from the

manufacturer.

1.3 Details of the safety data sheet supplier

> Supplier Unipol Holland BV

PO Box 5340 AV Oss The Netherlands + 31 412 643 243

Telephone Email algemeen@unipol.nl

1.4 **Emergency telephone number**

> Emergency telephone number + 31 (0)412 643 243 National Poisons Information Centre

+ 31 (0)88 - 755 8000 National Poisons Information Centre

(NVIC; only for professional emergency services staff in

case of emergencies)

SECTION 2: HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

> EU Regulation No 1272/2008 (CLP) Not classified.

2.2 Label elements According to Regulation (EC) No. 1272/2008 (CLP).

> Pictogram(s) None. Signal word None.

Hazard statements EUH018: In use, may form flammable/explosive vapour-air

> mixture. EUH210: Safety data sheet available on request.

P210: Keep away from heat/sparks/open flames/hot Safety measures

surfaces. - No smoking.

P233: Keep container tightly closed.

P243: Take precautionary measures against static

discharge.

P403 + P235: Store in a well-ventilated place. Keep cool.

2.3 Other hazards Product may release pentane, a flammable hydrocarbon.

May cause irritation to skin and eyes.

Does not contain any PBT or vPvB components. Contains

Version 2.1 Page: 1/10 Issue date: 10/1/2023

UNIPOL ECOFREPS

Issue date: 4/4/2023 **Replaces:** 10/01/2023 Version: 2.2

no known components with endocrine disrupting properties above 0.1%.

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.2. Mixture

Mixture of expandable polystyrene (EPS) and pentane isomers as blowing agent

Chemical name	%W/W	CAS No (EG No)	REACH Registration No	Hazard statements (CLP 1272/2008)	Specific CLP details
Pentane < 6 %		109-66-0 (203-692-4)	01-2119459286-30	Flammable liquids, Cat 1; H224. Aspiration hazard. Cat 1; H304. STOT SE 3; H336. Aquatic chronic, Cat 2; H411. EUH066.	EC Index No: 601-006-00-1
2-Methylbutane; iso-pentane	< 1.5 %	78-78-4 (201-142-8)	01-2119475602-38	Flammable liquids, Cat 1; H224. Aspiration hazard. Cat 1; H304. STOT SE 3; H336. Aquatic chronic, Cat 2; H411. EUH066.	EC Index No: 601-085-00-2
Dicumyl peroxide; DCP	< 0.3 %	80-43-3 (201-279-3)	01-2119541688-27	Org. Peroxide Type F; H242. Skin Irrit. 2; H315. Eye Irrit. 2; H319. Repr. 1B; H360D. Aquatic chronic, Cat. 2; H411.	EG Index No: 617-006-00-X

For the full text of each relevant hazard statement, see section 16.

Particle characteristics - Nanoform Not applicable.

SECTION 4: FIRST AID MEASURES

4.1 Description of first aid measures

Inhalation Move the victim to fresh air. If symptoms persist, obtain

medical assistance.

Contact with skin Wash the skin with water and soap. If symptoms persist,

obtain medical attention.

Contact with eyes Irrigate with eyewash solution or clean water, holding the

eyelids apart, for at least 15 minutes. If symptoms persist,

obtain medical attention.

Ingestion Unlikely to be hazardous if swallowed. If swallowed it will

not lead to vomiting. Obtain medical attention immediately

after swallowing.

4.2 Most important symptoms and effects, both

acute and delayed

Inhalation: headache, dizziness. Eye and skin contact: redness, irritation.

4.3 Indication of immediate medical care and

special treatment required

Treat according to symptoms.

SECTION 5: FIREFIGHTING MEASURES

Product is not classified as flammable, but will burn on contact with flames or exposure to high temperature (see Section 9).

Version 2.1 Page: 2/10 Issue date: 10/1/2023

UNIPOL ECOFREPS

Issue date: 4/4/2023 **Replaces:** 10/01/2023 Version: 2.2

5.1 Extinguishing media

Suitable extinguishing media Water spray, foam, dry powder or CO2.

Unsuitable extinguishing media Do not use water jet.

5.2 Special hazards arising from the substance or

mixture

This product may produce hazardous fumes in case of fire. Hazardous decomposition product(s): Carbon monoxide, Carbon dioxide, styrene, aliphatic hydrocarbons may be

released.

5.3 Advice for firefighters Firefighters must wear full protective clothing including self-

contained breathing apparatus. Wear haszmat suit. Keep containers cool by spraying with water if they have been exposed to fire. Flammable concentrations of pentane may accumulate during storage in closed containers.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures Caution - spilled beads may be slippery.

Pentane may form an explosive mixture v

Pentane may form an explosive mixture with air. Pentane vapour is heavier than air, be careful near manholes and in confined spaces. Conduct gas measurements where elevated concentrations of pentane may occur and take measures to prevent pentane accumulation. Remove or make safe all sources of ignition. Avoid friction, sparks, or other means of ignition. Take precautionary measures against static discharges. Use only non-sparking tools.

6.2 Environmental precautions

- Prevent entry into drains, soil and surface water.
- 6.3 Containment and cleaning methods and equipment

If safe to do so:

recovery.

- Small spillages: Sweep up and shovel into waste drums or plastic bags. Transfer to a lidded container for disposal or recovery.
- Large spillages: Where practicable, use vacuum equipment suitable for use in hazardous locations to collect spilt materials. Transfer to a lidded container for disposal or

6.4 Reference to other sections

See also sections 8 and 13.

SECTION 7: HANDLING AND STORAGE

7.1 Precautions for safe handling of the substance or mixture

Provide effective ventilation, including adequate local extraction. Do not inhale gas/vapour. Prevent formation of dust clouds. Keep away from naked flames and other sources of ignition. Extinguish any other fire. Remove or make safe all sources of ignition. Avoid friction, sparks or other means of ignition. The electrical system must be spark-free. Do not smoke during use. Take precautionary measures against static discharge. Ensure adequate earthing. Prevent release to the environment. Permission must be obtained from the competent local authority prior to disposing of spilled material.

Process hazards

Take precautionary measures against static discharge. To prevent the build-up of static electric charge and also the formation of an explosive pentane-air mixture, containers must be completely emptied during handling, preferably tilt packaging no more than 45°. Line velocity may not exceed 8m/s during normal pumping operations.

Version 2.1 Page: 3/10 Issue date: 10/1/2023

UNIPOL ECOFREPS

Issue date: 4/4/2023 **Replaces:** 10/01/2023 Version: 2.2

7.2 Conditions for safe storage, including incompatible products

All parts of the plant and installations must be electrically bonded and earthed. Check regularly for proper bonding and earthing. Wear anti-static clothing and footwear. No use of electrical devices (e.g. mobile phone) in the vicinity of the product unless they are explosion-proof.

Flammable concentrations of pentane may rise during storage in closed containers. Prior to unloading freight containers, open doors and allow to ventilate for one hour. Store containers tightly closed in a cool, well-ventilated place.

Keep away from direct sunlight and other sources of heat or ignition. Protect from rain and humid conditions.

Bulk: Keep under inert gas.

Open-top tanks must be fitted with an open rigid grate. Take precautionary measures against static discharge. The electrical system must be spark-free. The product is usually supplied in cardboard octabins, which are preferably not stacked.

Specific requirements for storage rooms or vessels

Storage areas must be kept cool to limit the release of pentane and provided with an appropriate ventilation system to prevent pentane build-up. Use must be made of measuring instruments that warn of any increase in concentration or explosive pentane/air mixture. The electrical system must be non-sparking.

Installations placed in potentially explosive atmospheres must comply with the requirements of ATEX Directive

94/9/EU. Ambient.

Storage temperature

Suitable containers

Storage life Stable under normal conditions.

Incompatible materials Avoid storage or handling together with UN Class 1

explosives. Steel (drums).

7.3 Specific end use Mainly used to produce foamed thermal insulation.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 Control parameters

8.1.1 Occupational exposure limit values

The following limits are for the blowing agent, (pentane is released during processing (expansion) during production).

n-pentane (CAS No 109-66-0; EC No 203-692-4). Source <u>www.ser.nl</u>

Skin/hand protection

Respiratory protection

Thermal hazards

8.2.3 **Environmental exposure control** Wear suitable gloves. Recommended: impermeable gloves

Material NBR, thickness 0.50mm, impermeable to solids (e.g. Ribiflex S NB 27 S, breakthrough time >480 min). Anti-static shoes type S1, S2 or S3 with PU sole or ESD

Wear an approved dust mask if dust is generated while handling the product. Type P1 (EN 143) or FFP1 (EN 149)

"muzzle" (e.g. GISS FFP1 839959).

Not applicable.

European and local regulations for Volatile Organic Compounds (VOCs) must be met if they apply to the EPS

industry.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic physical and chemical properties

(a) Physical state Solid, small round grains

b) Colour White. c) Odour Odourless

d) Melting point (°C) Not available e) Boiling point (°C) Not available f) Flammability (solid, gas) Not flammable g) Upper Explosive Limit (UEL)

7.8% (v/v) (Pentane) Lower Explosive Limit (LEL) 1.3% (v/v) (Pentane)

h) Flashpoint (°C) < -20°C (Pentane) (DIN 51755).

i) Auto-ignition temperature (°C) 285°C (Pentane) (ASTM E-659).

j) Decomposition temperature (°C) Not available k) pH (Value) Not applicable

I) Kinematic viscosity (mPa.s) Not determined Insoluble m) Solubility (Water)

Solubility (Other) Soluble in aromatic hydrocarbons, halogenated solvents

and ketones Not available n) Partition coefficient (n-Octanol/water) o) Vapour pressure (mm Hg) Not available

1.02-1.05 (1020-1050 kg/m³) @ 20°C (beads) p) Density (g/ml) Approximately 0.6 (600 kg/m³) @ 20°C Bulk density (g/ml)

q) Vapour density (Air=1) 2.5 (Pentane).

r) Particle characteristics Nanoform not applicable

9.2 Other information Softening point 70-75°C (beads expand under release of

pentane)

SECTION 10: STABILITY AND REACTIVIT

10.1 Reactivity Stable under normal conditions.

Version 2.1 Page: 6/10 Issue date: 10/1/2023

UNIPOL ECOFREPS

Issue date: 4/4/2023 **Replaces:** 10/01/2023 Version: 2.2

10.2 Chemical stability Stable under normal conditions.

10.3 Possibility of hazardous reactions In use, may form flammable/explosive vapour-air mixture.

10.4 Conditions to avoid Keep away from heat, sources of ignition and direct

sunlight.

10.5 Incompatible materials Avoid storage or handling together with UN Class 1

explosives.

10.6 Hazardous decomposition products Pentane, styrene monomer, carbon monoxide, trace of

hydrogen bromide (in case of fire or during hot wire cutting). When beads are expanded, pentane is released (the release of pentane increases with rising temperatures.

SECTION 11: TOXICOLOGICAL INFORMATION

This assessment is based on information from similar products

11.1 Information on toxicological effects

a) Acute toxicity

Inhalation The product may release pentane vapours, which may

lead to dizziness, headache and anaesthetic effects at

high concentrations.

Ingestion Unlikely to be hazardous if swallowed.

b) Irritation May cause irritation to skin.
 c) Serious eye damage/irritation May cause irritation to eyes.

d) Respiratory/skin sensitisation No data

e) Mutagenicity No dataf) Carcinogenicity No data

g) Toxicity for reproduction Contains dicumyl peroxide (DCP) classified as H360d.

Mixture is not classified as H360.

h) STOT for single exposure No datai) STOT for repeated exposure No data

j) Aspiration hazard Contains pentane and iso-pentane which are both

classified for aspiration hazard (H304). Mixture is not

classified as H304.

11.2 Information on other hazards Not applicable.

SECTION 12: ECOLOGICAL INFORMATION

This environmental hazard assessment is based on information available for similar products.

This product contains substances classified as environmentally hazardous. However, recent studies on aquatic organisms have shown that EPS granules, although containing these substances, do not need to be classified for environmental hazards.

12.1 Toxicity

Aquatic invertebrates: EC50 (48 h) > 100 mg/l, Daphnia magna (OECD Guideline 202, part 1, static) nominal concentration. The product has low solubility in the test medium. An eluate has been tested. Toxic effects were not observed within the range of solubility.

Version 2.1 Page: 7/10 Issue date: 10/1/2023

Persistence and degradability

14.6

Packing group

Safety Data Sheet

UNIPOL ECOFREPS

Issue date: 4/4/2023 **Replaces:** 10/01/2023 Version: 2.2

Aquatic plants: EC50 (48 h) > 100 mg/l, EC50 (72 h) > 100 mg/l (growth rate), Desmodesmus subspicatus (OECD Guideline 202, part 1, static) Nominal concentration. The product has low solubility in the test medium. An eluate has been tested. Toxic effects were not observed within the range of solubility.

The product itself has not been tested. In accordance with the required stability the product is not readily biodegradable. This statement has been derived from the structure of the product. It can be largely eliminated from water by abiotic processes, e.g. mechanical separation.

12.3 Bioaccumulative potential The product has low potential for bioaccumulation.

Bioconcentration factor (BCF) :< 100.

12.4 Mobility in soil The product is essentially insoluble in water. Expandable

polystyrene sinks in freshwater, may float or sink in

seawater.

12.5 Results of PBT and vPvB assessment The product does not comply with the criteria for PBT or

vPvB. Does not contain any PBT or vPvB components.

12.6 Endocrine disrupting properties Contains no known components with endocrine-disrupting

properties above 0.1%.

12.7 Other adverse effects Effect on effluent treatment: Practically non-toxic,

EC50>100mg/l, for organisms in wastewater treatment

plants (estimated).

Pentane has an extremely low Global Warming Potential

(< 0.00044) and no Ozone Depletion Potential.

RUBRIEK 13: DISPOSAL INFORMATION

Surplus, unused, old beads may still contain residual pentane. Therefore, the product has to be treated using all the safety measures in place for the fresh material. See also Section 7.

13.1 Waste-treatment methods Recover or recycle if possible. Remove all packaging for

recovery or disposal. Normal disposal is by means of incineration by an accredited waste processor.

13.2 Other information Dispose of contents in accordance with local, regional or

national legislation.

SECTION 14: TRANSPORT INFORMATION

Special precautions for the user

14.1 UN number UN2211

14.2 Proper shipping name EXPANDABLE POLYMERE BEADS, develops flammable

9.

vapour. (PENTANE).

14.3 Transport hazard class(es)

14.5 Environmental hazardsNone. Not classified as a marine pollutant.

Transport or conveyance on own production site: Refer to the internal procedures and information provided by this

Keep away from sources of ignition.

document.

Transport or conveyance outside own production site: Apply the requirements and regulations for the transport of hazardous substances and the manufacturer's

recommendations for loading, transporting, and unloading

recommendations for loading, transporting, and unloading

the material safely.

14.7 Transport in bulk according to Annex II of Not applicable. MARPOL and the IBC Code

Not applicable.

14.8 Additional information

Hazard Identification Number: 90.

Tunnel Restriction Code: D/E. IMDG EMS F-A, S-I.

Hazard label(s)

Sea transport (IMDG)

Air transport (ICAO/IATA)

UN Class 9 miscellaneous hazard label.

SECTION15: REGULATORY INFORMATION

15.1 Specific safety, health and environmental regulations and legislation for the substance or mixture

REACH (EC 1907/2006)

Candidate list for authorisation (Art. 59)

Does not contain any substances on this list.

Authorisation (title VI)

Does not contain any substances on this list.

Restrictions (title VII)

Does not contain any substances on this list.

Does not contain any substances on this list.

National regulations Not applicable (as far as known).

15.2 Chemical safety assessment Not applicable to the mixture.

SECTION 16: OTHER INFORMATION

This safety data sheet has been prepared in accordance with EU Regulations 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878 (last amendment REACH Annex II).

The following sections have been revised or contain new statements: sections 2.3, 11.1, 12.5, 12.6 and 16.

LEGENDA

OEL Occupational Exposure Limit (Occupational Exposure Limit)

IOEL Indicative Occupational Exposure Limit (Occupational Exposure Limit)
